PROFESSIONAL SUMMARY

Computer Science undergraduate student with honors in AIML specializing in Artificial Intelligence and Full-Stack Development with hands-on experience building scalable web applications, AI-powered systems, cloud-based solutions and with industry experience through multiple internships .Skilled in React, Next.js, Node.js, Express, PostgreSQL, AWS Bedrock, Azure, and modern software engineering practices. Passionate about developing intelligent applications that solve real-world problems.

WORK EXPERIENCE & INTERNSHIPS

PROPHAZE TECHNOLOGIES *Apr 2026 – May 2026*

AI Academic Intern

-Conducted research on Small Language Models (SLMs) and Hybrid Reasoning Models (HRMs), evaluating their suitability for real-world AI applications.
-Benchmarked on-device AI models across latency, memory usage, inference speed, and deployment feasibility for edge devices.
-Performed comparative analysis of Generative AI architectures through literature reviews and technical evaluations, documenting key findings for the research team.
-Explored optimization strategies for mobile AI deployment, focusing on efficient inference and resource-constrained environments.

PRODDY AI *Dec 2025 – Mar 2026*

Full Stack Developer Intern

-Developed and enhanced full-stack web application features using modern Next.js, improving application functionality and user experience.
-Built and integrated REST APIs, streamlining communication between frontend and backend modules for scalable development.
-Collaborated with developers using Git-based workflows, participating in code reviews, bug fixes, and feature implementation across multiple sprints.
-Optimized application performance by identifying and resolving UI and backend issues, improving overall responsiveness and maintainability.

PROJECTS

IEEE ERP Platform | React, Node.js, Express, PostgreSQL, Prisma, Azure *Jun 2026 – Jul 2026*

-Developed enterprise-grade modules for an IEEE Student Branch ERP platform, implementing secure REST APIs, role-based workflows, and scalable database models using React, Node.js, Express, and Prisma.
-Integrated Azure Blob Storage for secure file management and AWS Bedrock-powered AI services for intelligent funding discovery, improving platform automation and maintainability.

AI-Assisted Quality Inspection (PS-7) | Python, YOLO11, FastAPI, SQLite, Next.js, WebSockets *Nov 2026-Dec 2026*

- Built an end-to-end defect detection system for hot-rolled steel surfaces by training a YOLO11n detector on the NEU-DET dataset and serving it through a FastAPI backend that handles images, batches and videos, stores results in SQLite and sorts each item as approved, needs review or rejected. A Next.js dashboard shows model evaluation with a leaderboard and per-class recall, plus video inspection with bounding boxes, confidence scores and defect alerts. The recommended model reached 0.768 mAP@50 on the held-out test.

SKILLS

Programming Languages: Python | JavaScript | TypeScript | Java |
Frontend: React.js. | Next.js | HTML5 | CSS3 | Tailwind CSS
Backend: Node.js | Express.js | REST APIs | Prisma ORM
Databases: PostgreSQL | MongoDB | MySQL
AI & Machine Learning: Prompt Engineering | Claude | OpenAI API | ObsPy | Streamlit | PyTorch | TensorFlow
Cloud & DevOps: AWS | Azure Blob Storage | Docker | Git | GitHub | AWS Bedrock
Tools & Technologies: VS Code | Postman | Figma | Linux
Core Concepts: Data Structures & Algorithms | Object-Oriented Programming | DBMS | OS |Computer Networks | Software Engineering
Soft Skills: Problem Solving | Team Collaboration | Leadership | Communication| Agile Development |Team Management | Time Management
Languages: English (Fluent) | Malayalam (Native) | Hindi (Conversational)

CERTIFICATIONS & TRAINING

Introduction to Large Language Models (LLMs) — NPTEL / SWAYAM *(Nov 2025)*
Claude Code in Action ,Claude 101 — Anthropic (Mar 2026)
Fundamentals of Networking — Infosys Springboard *(Mar 2026)*
Introduction to AWS Academy Cloud Foundations — AWS Academy *(Aug 2026)*
Full Stack Development — L&T EduTech (ongoing) *(Apr 2026)*

CO-CURRICULAR & LEADERSHIP

Treasurer IEEE Student Branch, CHRIST (Deemed to be University), Bengaluru Jan 2026- Jan 2027

-Managed financial operations and budgeting for an IEEE Student Branch comprising 400+ student members, ensuring transparent allocation of funds and smooth execution of organizational activities.
-Led the planning and execution of large-scale technical events, including hackathons, workshops, seminars, and speaker sessions, coordinating cross-functional teams, sponsors, and volunteers to deliver successful programs.

ACHIEVEMENTS & AWARDS

Merit Scholarship – Top 5% of Batch — CHRIST University *2025-2027*

RESEARCH

Detection of Tycoon 2FA Phishing Emails using Machine Learning & Email Header Analysis 2026- Present

*-Conducting research on **Tycoon 2FA**, a phishing-as-a-service (PhaaS) framework, focusing on attack methodologies, adversary infrastructure, and modern email-based social engineering techniques.*
-Developing a detection methodology by analyzing email headers, authentication records (SPF, DKIM, DMARC), URLs, and linguistic patterns to identify emails potentially generated by Tycoon 2FA, with findings being prepared for publication.
